GRADES AND AMOUNT OF LUMBER: SAWED FROM YELLOW POPLAR, YELLOW BIRCH, SUGAR MAPLE, AND BEECH (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Grades and Amount of Lumber: Sawed From Yellow Poplar, Yellow Birch, Sugar Maple, and Beech The Forest Service has endeavored to determine, in typical localities and under good conditions of manufacture, the graded yield. And the money value of some important Commercial trees. It should be borne in mind, however, that the figures obtained will in no means fix absolutely the graded yield and the value of the species studied over their entire range of growth. The character of timber changes in different localities and in different situations within the same locality; the conditions governing its logging, control the manner and extent of each tree's utilization; the demands of a given market regulate methods of manufacture; the efficiency of the mill and of the mill crew affects the quality and quantity of the products; and the nature and application of the grading rules determine results. Therefore the results from no two mills can be exactly similar. Nevertheless, figures such as those given for yellow poplar, yellow birch, sugar maple, and beech give relatively, if not absolutely, the graded yield and the value of the species. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
