Excerpt: . . . of examining each patients medical record, one after the other, to find the information needed to determine the appropriate values for each of the required data elements for that patient. Then, for each patient, those values were entered by computer into an electronic form or template listing each of the data elements for that condition. These forms were provided by the data vendor with which the hospital had contracted to transmit its quality data to CMS. The vendors also assisted the hospitals in checking that the data were successfully received by CMS. Finally, the hospitals sent copies of the medical records of a selected sample of patients to a CMS contractor that used those records to validate the accuracy of the quality data submitted by the hospital.
