

## Influence de La Charge de Cokefaction Sur Rendement Et Qualite Du Coke (Paperback)

By Hennaoui-F

Univ Europeenne, United States, 2011. Paperback. Condition: New. Language: French . Brand New Book. Le coke anisotrope est utilise pour la fabrication des electrodes en graphite pour la production en acier et la fabrication des anodes pour la Production en aluminium. Le present travail consiste a l etude de l influence de la qualite de la charge du procede de cokefaction sur le rendement et la qualite du coke, et pour cela nous avons etudie des residus d un petrole Algerien (residu atmospherique, residu sous vide et residu du craquage catalytique). Comme ces residus sont riches en composes fortement polaires, qui ont un role dans la formation du coke, et comme la dispersion de ces derniers ameliore la qualite du coke, L objectif initial visait une utilisation d un dispersant a fin d orienter le depot des agregats formes a partir des asphaltenes qui constituent les structures complexes unitaires (SCU), caracterisees par la stabilite d agregation, dont le but est d arriver a un coke a structure cristalline.
