Edward Elgar Publishing Ltd, United Kingdom, 2013. Hardback. Condition: New. Language: English . Brand New Book. The Governance of Climate Relations between Europe and Asia offers a thorough empirical study of the most fundamental dynamics involved in EU climate relations with China and Vietnam in the context of global climate governance. This book presents a study of the most important governance processes in current EU-Asia climate relations. It focuses on in-depth empirical case studies, offering a comprehensive relational perspective. Contributions on China cover the most essential issues, interests and actors, while the inquiry of EU-Vietnam relations mainly focuses on the Clean Development Mechanism as the main channel of bilateral climate action. This landmark study will appeal to both policymakers and practitioners faced with the extraordinary task of managing the increasingly complex and multilevel interactions of current EU-Asia climate relations as well as global carbon market watchers and professionals dealing with emissions trading in the European Union, China and Vietnam. It will also be of interest to scholars and postgraduate students of international relations, Chinese and EU foreign policy, global environmental and climate governance and international law.
